Business relations

I invite you to buy, in the online store, a subscription specialized in calculating interest on the internet portal "**The online calculator interest rate - Product placement**" - [https\[port 443\]://grayewerttomasz.com](https://grayewerttomasz.com)[domain].

The portal is a web application that allows Internet users to calculate interest on deposits using interactive online calculators and to draw up loan repayment schedules in several configurations.

The generated calculations may constitute attachments to deposit, lease, loan or credit agreements, or only simulations of such documents intended for profit calculations.

The portal, not being a direct competition to much more powerful office packages, turns out to be a useful tool for Internet users and professional financiers in a specialized - specific application, namely calculating interest.

The portal's users are Internet users from over 120 countries of the world.

The Portal Code contains innovative, fast algorithms written rationally, with clockwork precision, has more true-false logical conditions and executes many times more conditional control instructions than gold and platinum mechanical watches that indicate the daily time have cogs in gear wheels.

The portal, evoking positive emotions.

Links allow 200,000 page views [schedule calculations] per day.

Potentially, in the course of its activity, the Service reached **85,000 people directly, the circle of people who received the schedules with calculations is estimated at 3M.**

The portal's server is able to accept 100 webpage display requests at the same time and execute them within a few seconds. The portal server can open the portal web page in less than a second.

The portal server can have up to 30 minutes of downtime per day. Compensation is due for improper performance of the contract.

The calculated schedule needs to be checked and signed by the person introducing it into legal circulation. Periodic control of algorithms, carried out by the owner, administrator and author of the software, confirms the satisfactory quality of the computer code.

The most important part of the computer code of the financial calculator [Days() method] is already 14 years old [2009].

The estimated value of the algorithms used by the portal is PLN 9'000'000. The value of the algorithms is currently spread over three projects, i.e. the website "The online calculator interest rate - Product placement" [PLN 2'000'000], promotional desktop software in the form of interest rate calculators GRAY - KOB / KPSK / KU / KP [PLN 1'000'000] and development software in the development state - Settlement System [PLN 6'000'000].

The portal server runs on the *Debian* operating system, with the *NODEJS* and *PM2* modules.

In the case of other inquiries, it is possible to contact us by phone: +48505828647 and preferably by email: admin@grayewerttomasz.com.

Goods	Price
Subscription – up to 25 pieces	~1,60 USD per schedule calculation
Subscription – up to 100 pieces	~1,00 USD per schedule calculation
Subscription – up to 500 pieces	~0,80 USD per schedule calculation
Subscription – up to 1000 pieces	~0,70 USD per schedule calculation
